OUR VISION

Africa's Diverse Pioneering Water Partner

OUR MISSION

GWP is committed to making water an environmentally safe and sustainable reality. We are dedicated to delivering excellent service to our clients and conducting our work at the highest standards with integrity and honesty. We embrace our obligation toward the social improvement of Africa as a whole and strive to maintain long-term relationships with our clients and service providers.

OUR VALUES

Our company is founded upon a perpetual work ethic and a remarkable winning approach to every task, job or project that we take on. We pride ourselves on being a fearless yet modest company, upholding honesty, integrity, ethics and respect for the environment as well as the people who we work with and for.

Committed to making water an environmentally safe and sustainable reality

THE MANAGEMENT APPROACH OF THE COMPANY

- Clarity of client requirements
- Continuous communication
- Continuous learning
- Quality service
- Transparency
- On-site Management

ABOUT US

Our vast knowledge and experience spans from groundwater testing and abstraction to coal bed methane gas extraction. We also specialize in the installation of pumps, water supply, systems design and installation, hydraulic fracturing and ground water monitoring.

GWP is committed to safe abstraction of water resources while empowering the disadvantaged to make a sustainable livelihood. It is our belief that only through experience, interaction, team work, participation and continuous learning will the above be achieved. Along with the correct equipment GWP have a staff complement of dedicated professionals consisting of Project Managers, Engineers and artisans who have the required skill and experience to ensure that quality deliverables are met.

Africa's Diverse Pioneering Water Partner

OUR COMMITMENT

Ground Water Practitioners strives to become one of our country's top water companies.

Honesty, integrity, effectiveness and customer satisfaction remains a top priority in all spheres of our business.

BUSINESS ACTIVITIES

Amongst the numerous projects we have undertaken, the following are the most recent:

- Central African Republic, Bakouma; Aquifer testing for a Uranium mine, dewatering and installation of community boreholes hand pumps.
- Mozambique, Tete; Mine dewatering
- New Vaal Colliery: Well rehabilitation
- De Beers Mines Botswana: Deep well yield testing from 450m pump depths, for mine dewatering.
- X Strata Coal S.A: Exxaro Mine and X strata Mine; Borehole video camera inspections
- Jones & Wagner Consulting: Borehole yield testing.
- V.G.C. Consulting: Water supply for municipalities and towns
- K.L.M. Consulting Mine dewatering and yield testing
- WRP Consulting: Rural water development projects
- Finch Mine: Underground water monitoring
- Steelpoort: Platinum Mine—dewatering and supply
- Anglo Coal – dewatering and CBM

CORE SERVICES

General Borehole Services

- Pump selection, supply, installation, repair and maintenance
- Sectional sealing of polluted water in boreholes
- Fishing of lost equipment in boreholes
- Down-hole camera inspections
- Inflatable packer injection testing
- Mine dewatering
- Well rehabilitation
- Drilling Consultants
- Capacity Testing
- Verticality testing of Boreholes

Bulk Water Supply

- Pump selection, supply, installation, repair and maintenance
- Pipeline design, supply, installation and repair
- Rural water development projects and reticulation
- Aeration of lakes dams and ponds
- Water tanks and stands
- Supply of water treatment chemicals

Wastewater Treatment

- Pump selection and installation
- Design and installation of effluent reticulation systems
- Pump station design and construction

Coal bed Methane (CBM)

- Coal bed Methane gas extraction
- Coal bed permeability testing
- Notching of casing and cement
- Coal bed fracing
- Complete fitting for methane and water extraction as well as separation of methane from water
- Purification of brine water
- Grouting of casing
- Dewatering with locally produced product
- Flaring of gas and Gas analysis
- Power generation
- Electrical (HD and LT – overhead and underground) and Pipeline

It is our belief that only through experience, interaction, team work, participation and continuous learning will success be achieved

INFLATABLE PACKERS

GWP is the African agent for IPI International. We specialise in the design and manufacture of inflatable packers for use in the following areas:

- Water, Oil and Gas Wells
- Coal Bed Methane
- Mining and Mine Dewatering
- Geo Technical
- Geo Thermal
- Construction (including offshore)
